BMI Drilling

BMI Drilling's Mission

Through successful partnerships and sustainable projects to create wealth and experience for all our stakeholders, including a skills transfer to our employees and to be uncompromising in safety standards and ethics.

BMI Drilling, mining specialties include, blast hole drilling, exploration drilling, borehole drilling, blasting, load and haul and are proud to be part of the first PV Solar projects in South Africa and we hope to participate further in these projects.

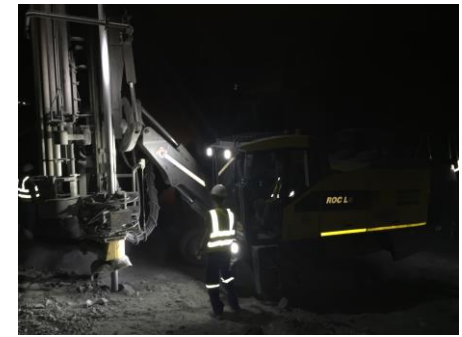

We have successfully completed projects in Lesotho, Botswana and throughout South Africa, offering a comprehensive range of services and products to suit all mining needs.

About BMI Drilling

BMI Drilling has many years of experience in the mining and civils industry. We provide a professional honest service.

We are located in Lesotho, Northern Cape, Free State, Northwest, Western Cape, Gauteng, Limpopo, Botswana and most recent Namibia, and have the ability to service the surrounding areas.

Our vision is to become the leading drilling company of choice throughout Southern Africa.

We can offer

- BMI Drilling has the capacity to drill holes ranging from 63mm to 300mm (depending on depths, ground conditions etc.) with a fleet of 32 Atlas Copco Drills.

Current Projects include

- Letseng Diamond Mine.
- Lihobong Diamond Mine
- Muhanga Mines.
- Sedibeng Iron Ore.
- Jwaneng Diamond Mine Botswana

Currently we do a minimum of 170,000 meters per month drilling blast holes.

BMI Air, specializes in all aspects of compressed air systems and air filtration, offering a wealth of global air experience across the entire range of technologies, supporting diversified industries from Oil & Gas, mining, packaging, food and beverage down to general industry.

We work to identify promising opportunities and solutions which will benefit our partners across the manufacturing spectrum.

Together, we develop real world solutions to address near term opportunities to real world problems, delivering robust products and services to help the industry implement proven technologies and practices that offer the most cost effective options for compressed air & filtration system, saving energy and optimizing your processes.

Partnership is key to success.

The economic challenges facing the industry today highlight the critical need for innovative technology and solutions that increase productivity, sustainability and competitiveness.

We Provide

- Sales & Services of compressed air equipment.
- Sales and services for AAF clean air products and systems.
- Maintenance & Site Services.
- System Assessments & Audits.
- Energy management & condition monitoring services.
- Compressed air system optimization & utilities.
- Pressure Vessel testing & certification - SANS 347:2007
- Thermal Imaging & Ultrasonic leak detection.
- Remote Monitoring and control systems.
- Preventative maintenance program design and support and training.

BMI Air's vision, is to become market leaders in providing our customers with products and service solutions which enhances their productivity, sustainability, competitiveness and operation in today's market.

Through

Our Partnership,

Developing sustainable and mutually beneficial partnerships with our customers.

Our Pledge,

Work to identify opportunities and generate solutions which will benefit our partners. Promoting a safer and greener environment, with more energy efficient solutions, increasing productivity by delivering robust products and services.

Our Progress

We continually ask ourselves:
How do we improve?
What do our customers expect?
What can we do to meet our customers' expectations?

..... optimise, reliability and production

Our Partners

With over 100 years of knowledge and experience, BOGE is recognised throughout Europe and particularly in Germany as a quality manufacturer at the top end of the industrial compressor industry. BOGE manufactures a complete range of lubricated and oil free screw and piston compressors from 1 to 480 HP alongside a complimentary range of quality ancillary compressed air products. Compressed air is considered the fourth utility and you can find the BOGE product in most industry sectors, not least, pharmaceutical, food, plastics and steel & mining sector.

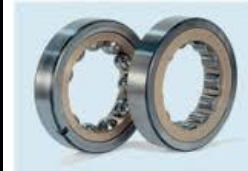

Dependable
compressed air
solutions conceived

Excellence in
design

Efficiency driven

Several studies have shown that the costs for compressed air generation are up to 30% higher than they should be. Furthermore, about 10% of the energy in the industry is used for compressed air generation with an increasing demand

Supporting a product portfolio of:

A large range of screw compressors, whisper quiet, efficient operation

Scroll compressors ensuring protection from contamination with oil free compressed air.

Compressed air treatment, heat recovery, cyclone separators, dryers, absorbers, pre-filter, micro filters and oil-water separators.

Special gases
Nitrogen PSA Generators

BMI Air currently servicing customers such as:

- Anglo American Iron Ore
- Anglo Platinum.
- Silicon Smelters
- Portland Pretoria Cement
- Department of Water Affairs.

Our Partners cont.'

Today, selling under the **AAF® and AmericanAirFilter®** brand names, AAF clean air products and systems offer the most comprehensive clean air solutions available in the world. AAF products are the industry benchmarks for quality and performance, from simple roughing filters, to air pollution control, to gas containment removal, to the highest efficiency filters used in the most stringent clean environments.

REDClean® Cartridges

Increased efficiency MERV 15 & F9 EN 779

Increased life – lasting more than double the life of standard media

Reduced compressed air usage – resulting in reduced cleaning and longer cartridge life

Lower stable operating pressure – reducing the cost of operation

Lower total cost of ownership.

Wet and Dry Dust collectors

RotoClone® LVN

Engineered Simplicity.

Efficient.

Compact.

Economical.

Supported Industries include

Cement & rock processing.

Chemical.

Coal and coal mining.

Fertilizer plants.

Food and Beverage

Oil & Gas

Pharmaceuticals.

Waste water and woodwork

AAF offers the most comprehensive global manufacturing capabilities in the air filtration industry, and each facility is specifically designed to manufacture and test the most complex clean air solutions. Additionally, each facility manufactures to the appropriate international quality and performance standards.

What we as AAF offers

- Air Filters
- Dust Collection Equipment.
- Dust Collector Cartridges, Bags & Replacement Parts.
- Environmental systems.
- Gas Turbine & Rotating Machinery Equipment
- Gas Turbine & Rotating Machinery Filters.

BMI Industrial Supplies

BMI Industrial, services and supplies all spheres of industry with superior products and services. Realizing that from initial contact, to the first day the contract commences, right through until the end, we will consult with you to supply, support and develop tailored service and products.

Which meets all your unique requirements. We understand that no two companies are the same. Communication plays an integral role in our ability to provide our services and support.

Bray

Bray International was incorporation on April 23, 1986. Bray has become a leader in the butterfly valve and control market worldwide along with ball and knife gate valves.

Powering your productivity.

CP helps make tough jobs easier.

Delivering best-in-class.

Added value by delivering the best solution to meet your needs.

We provide:

Sales & Services for the entire range of Bray Valves and controls inclusive of system assessments & audits

Sales and Services for Chicago Pneumatics Portable Power equipment (Diesel Compressors, lighting towers) as well as the complete range of construction equipment.

Through Pirtek we offer a comprehensive range of fluid transfer solutions, products & services to industries. Specialising in hydraulic hoses, pipe fittings & couplings

Maintenance & Site Services.

Fluid Transfer Solutions

Our pledge is to provide our customers with high-quality products and superior standards of customer service and support. We respond rapidly to customer needs. We know how critical timeliness and responsiveness is to business.

Our focus

Is service!...

Guaranteed!

Our Partners

Portable Power

Construction Equipment

People. Passion. Performance.

Our goal is to deliver best-in-class global service and local support to our industrial and construction customers through a dedicated product portfolio and a strong support. We generate added value by delivering the best solution to your needs based on our experience

Powering your productivity.

CP helps make tough jobs easier.

Our CP Product Portfolio

CP Compaction Equipment

CP Compressors

CP Concrete Equipment

CP Construction Tools

CP Generators

CP Handheld Construction Tools

CP Light Towers

CP Portable Compressors

Together with CP we offer an extensive range of handheld pneumatic, hydraulic and petrol-driven tools alongside compaction equipment, rig-mounted attachments, portable compressors, generators and light towers. All are designed for job site-tough durability, long-lasting performance and ease of use.

Pirtek, in partnership with BMI Industrial specialize in the assembly, supply and installation of hydraulic and industrial hose and fittings to almost any type of business. We provide a 24 hour, 7 days per week on-site mobile breakdown service to our customers. Pirtek manages the entire fluid power and service requirements in a customer's workplace by providing:

- The right people
- With the right products and services
- In the right place, when you need them most!

We are dedicated to excellent service and expert advice and workmanship, as well as convenience. We go out of our way to establish the need and to provide the proper solution to ensure complete satisfaction of the need.

Supporting industries

Civil engineering, Engineering, Automotive, Oil and Gas, Construction, Transport, Manufacturing, Materials Handling, Mining Agriculture Earthmoving Building Defense, Production and Retailing.

As BMI Pirtek we provide

On site hose replacement 24 hours, 7 days per week

Rapid response times

An extensive range of highest quality products available from our service & supply centers.

- Equipment inspections and appraisals.
- Supply of hose and fitting kits.
- Hose testing and certification.
- Hose cleaning.
- Complete hose management programs.
- Environmental product management.

Including spill bin audits

- Supply & installation of greasing and lubricating systems
- Comprehensive product and service consumption reporting.

Our business is helping our customers with their flow control requirements. Our modular product line of valves, actuators and accessories offer the best compatibility, economy and quality performance in the flow control industry

Bray is the largest Quarter turn valve manufacture globally.

The Bray/VAAS Series 762 is a bidirectional heavy duty slurry valve.

Designed for demanding high pressure slurry applications.

Twin elastomer seats and push-through gate design facilitate self-cleaning and prevent media build up.

Our Bray Products

Butterfly Valves

- Resilient Seated.
- Double Offset
- Triple Offset

Knife Gate / Slurry Valves

- Unidirectional
- Bidirectional

Ball Valves

Actuators

- Pneumatic
- Electrical

Check Valves

Accessories

- Positioners
- Valve status monitoring
- Solenoids & Filter regulators

BMI Group

Health and Safety

OUR DEFINITION

The Oxford English dictionary defines Quality as a degree of excellence. At BMI our degree of excellence is defined by striving toward obtaining ISO 9001 Quality and OSHAS 18001 Occupational Health and Safety Certification.

OUR AIM

Our SHEQ system will serve as ongoing measurement tool to ensure effective management of the priority item identified through our assessments.

OUR OBJECTIVES

SAFETY AND HEALTH (SH)

To pro-actively reduce the frequency and severity of injuries. Awareness of risk and the legal requirements amongst employees. To promote and environment where all employees accept responsibility for their own safety and that of others. To pledge continuous compliance and upgrading of the BMI Hse Management systems.

SHEQ Policy Statement

QUALITY

In our Company, Quality standards are achieved when our joint effort in delivering a service of product that meets or exceeds our clients specified requirements. We value and nurture our client relationships. We carefully evaluate and select our suppliers, subcontractors and partners, striving for mutual beneficial relationships. We promote learning, increasing knowledge and transferring skills according to an identified program.

OUR APPROACH

At all levels in the company, managers implement a clear system of Safety, Health and quality checks by:

Identifying Hazards and Risks

Determining Priorities

Setting SHEQ Objectives

Formulating Action Plans

Measuring progress regularly and analysing the results.

By being focused on SHEQ, we control Risk and Enhance Efficiency

OUR COMMITMENT

At Management level we are personally committed to achieving excellence and we commit all employees to achieve their SHEQ Objectives.

IMPROVEMENT

At BMI we implement an Annual Plan for Improvement. The Improvement Plan is consistent with our business strategy, and ensure continuous improvement of the SHEQ Management System.

YOUR ASSURANCE

Our implementation of OSHAS 18001 Occupational health and Safety, ISO 9001 Quality assurances. Successful identification of Priorities for effective Management
